| 5:15 - 6:00 pm | "Women in Science – we will survive and thrive!",
Prof. Dr. Susan Wray |

Wine reception

This lecture series brings prominent female scientists to Cologne to discuss the role of women in science and society. The lecture targets at a general audience, addresses the speaker's experience as a woman pursuing a scientific career and how to combine this with family life. In addition, the speaker will show how her home country and university deal with gender equality.

We especially encourage young scientists of both genders to attend the lecture. We hope to welcome you at the lecture and the discussion afterwards.

Prof. Dr. Carien Niessen, Speaker SFB 829
