makes the  
difference!

# VACCELERATE Volunteer Registry

*Improving Healthcare Quality  
for a Better Tomorrow*

## Our Services:

- Special clinical trials for older adults (e.g. evaluating the effectiveness and safety of COVID-19 revaccination)
- Investigation of respiratory infections identifying 5 different pathogens simultaneously
- Survey on polio vaccinations from the vaccination card and information on the individual vaccination status

Your registration does not commit you to anything. Of course, your care and safety come first. If you participate in a study, you will receive extensive medical care.

Anyone can register within a few minutes. In Europe, the Volunteer Registry already includes more than 100,000 people. If you register yourself, we can inform you by email as soon as a study fits your profile. Only then you will decide whether you want to contact the study organisers and receive more information about the offered study.
