yes no I agree that my picture is shown on the KPA subpage of the CECAD website in the KPA member list, I will provide a file

My main topics of research (max 100 words, or bullet points)

My scientific contribution to the research of the AGING KPA (bullet points only)

The accelerating demographic change towards an increasingly aging society poses urgent socio-economic and health challenges with consequences across all sectors of public life. Addressing these interconnected dynamics requires new approaches and measures in society at large across the politics medicine, health care, economics etc. to ensure that future societies age in an equitable and sustainable way.
