

Women in Science and Society

Open for all!

Professor Dr. Irene M. Leigh | Dundee University

„From discovery to treatment: challenges in translation“

„The changing landscape for women in medicine: the UK experience“

Venue: CMMC lecture hall, Robert-Koch-Str. 21

Program

Tuesday, September 3rd, 2013

Scientific Seminar:

12:00 - 1:00 pm **“From discovery to treatment: challenges in translation”**
Professor Dr. Irene M. Leigh

General Lecture:

4:00 - 4:10 pm Welcoming words by Prof. Dr. Thomas Krieg,
Dean of the Medical Faculty at the University of Cologne

4:10 - 4:15 pm Introduction Prof. Dr. Carien Niessen

4:15 - 5:00 pm **“The changing landscape for women in medicine: the UK experience”,** Professor Dr. Irene M. Leigh

Wine reception

This lecture series brings prominent female scientists to Cologne to discuss the role of women in science and society. The first lecture is a scientific seminar for the biomedical community. The second lecture, which targets at a general audience, addresses the speaker's experience as a woman pursuing a scientific career and how to combine this with family life. In addition, the speaker will show how her home country and university deal with gender equality.

We especially encourage young scientists of both genders to attend these lectures. We hope to welcome you at the lecture and the discussion afterwards.

Prof. Dr. Carien Niessen, Coordinator SFB 829 | Prof. Dr. Anja Steinbeck, Vice-Rector

MOLECULAR MECHANISMS
REGULATING SKIN HOMEOSTASIS
