

Lecture series SFB 829

Women in Science and Society

Organized by SFB 829

"Molecular Mechanism Regulating Skin Homeostasis"
& the Rectorate University of Cologne

Professor Dr. Angela Christiano

Columbia University New York

noon

"Molecular Basis of Hair Disorders"

Venue: CMMC Lecture Hall, Robert-Koch-Str. 21

4:00 pm

"Women in Science: More than Skin Deep"

Venue: Seminar hall in new Seminar building
(Albertus-Magnus-Platz)

Wednesday, October 26th, 2011

Professor Christiano will present a scientific seminar on her recent research and a general lecture on the role of women in science and on how American universities deal with gender issues.

Program

Wednesday, October 26th, 2011

Scientific Seminar

12:00 – 1:00 pm.: **"Molecular Basis of Hair Disorders"**
Professor Angela Christiano

Venue: ZMMK Lecture Hall,
Robert-Koch-Str.21

General Lecture

4:00 - 4:10 pm.: Welcoming words by
Prof. Dr. Thomas Krieg

4:10 - 4:15 pm.: Introduction
Prof. Dr. Carien Niessen

4:15 - 5:00 pm.: **"Women in Science:
More than Skin Deep"**
Professor Angela Christiano

5:00 pm.: Wine and Cheese reception

Venue: Seminar hall in new
Seminar building
(Albertus-Magnus-Platz)

This lecture series brings prominent female scientists to Cologne to discuss the role of women in science and society. The first lecture is a scientific seminar for the biomedical community. The second lecture, which targets at a general audience, addresses the speaker's experience as a woman pursuing a scientific career and how to combine this with family life. In addition, the speaker will show how her home country and university deal with gender equality. We especially encourage young scientists of both genders to attend these lectures. We hope to welcome you at the lecture and the discussion afterwards.
